A2ARQUITECTOS is a Madrid and Mallorca-based practice whose innovative design is witnessed in a multitude of high end hotel and residential projects.

The emphasis is on customization, space-optimisation, playfulness, brightness and inherent charm. Details are designed and then reinvented for each new client with the aim of combining up-scale quality and comfort.

Led by Juan Manzanares and Cristian Santandreu, A2arquitectos has been awarded with national and international awards, with their work featured at the Palais de Tokyo in Paris and the Munich Mixed Art Museum.

Inspired by the magical setting of their Mallorca office, the A2arquitectos have created a number of ultra-high end projects that celebrate the unique Mediterranean light and flora.

Light is, in fact, the main protagonist in one of their flagship spas, at Hotel Castell dels Hams. The boutique establishment was built in 1967, in a breathtaking natural location, and over time, and through subtle improvements and extensions, it has become one of the most distinctive hotels on the eastern part of the island.

The latest alterations, conceived to celebrate the Mediterranean light and the location's idyllic bond with nature, have transformed the hotel into much more than just a holiday destination.

The main pool area is adorned with a series of square openings for roof windows, allowing the light to flood the entire area. The beauty and relaxation spa is positioned so as to give the visitors the best views of the surrounding landscape and filled with light where light is needed.

The pool is dotted with a series of square openings and the interplay with window lights creates a beautiful dance of reflections in the building.

In the spa area, the space is sculpted and colourful showers of light flow through the roof openings. This makes the building itself part of the treatment, generating a feeling of well-being created by nature as introduced into the building, a feeling of total immersion for the visitor.
